

## **CSC-603 Cloud Computing**

### **Question Bank**

#### **Chapter-1:**

1. What is cloud computing?
2. What are the characteristics of cloud computing?
3. Explain cloud computing architecture.
4. “Shared pool of configurable computing resources in cloud server” Justify the statement.
5. List the working models of cloud computing.
6. Explain Service Model in detail.
7. How cloud computing architecture can be visually modelled?
8. Explain the essential characteristics of cloud computing.
9. How are common characteristics in cloud computing modelled?
10. Explain Cloud Deployment Models.
11. What are the advantages of cloud computing?
12. What are the disadvantages of cloud computing?
13. Explain the difference between Cloud, Cluster and Grid computing.
14. Define: Service Provider.
15. What do you understand by service aggregator?
16. Give the tasks of Web Services.

#### **Chapter - 2**

17. Explain Virtualization in cloud computing environment.
18. What do you mean by hypervisor?
19. Define: Host machine.
20. Define: Guest machine.
21. Explain: Full Virtualization.
22. Give the difference between Partial Virtualization and Full Virtualization.
23. Explain: Emulation Virtualization.
24. Explain Virtualization types in detail.
25. Explain Type1 and Type2 hypervisor.
26. Give the difference between Type1 and Type2 hypervisor.
27. Explain the hypervisor reference model.
28. Define: Dispatcher.
29. Define: Allocator.
30. Define: Interpreter
31. Explain: Hypervisor Architecture VMware.
32. Give the approaches of Multi-Tenancy.

#### **Chapter-3**

33. What do you understand by cloud service delivery models?
34. What is infrastructure as a service?
35. What all the resources that IAAS offer?

36. Explain the architecture of IaaS.
37. What are the advantages of IaaS.
38. Does IaaS allow the customer to access computing resources through VM.  
Comment.
39. What are the Issues of IaaS?
40. What are the characteristics of IaaS?
41. Explain Resource Virtualization. List the primary functions.

#### **Chapter-4**

42. Explain the concept of platform as a service.
43. How PaaS offers services to end user to access business applications?
44. What are the characteristics of platform as a service?
45. What are the types of PaaS?
46. How PaaS is used?
47. Explain SOA.
48. What are the advantages of PaaS?
49. Give the roles of SOA.
50. What are the operations of SOA?
51. Define: Bind operation.
52. What are the key benefits of SOA?
53. Explain the different types of SOA architecture.
54. When to use PaaS?
55. Give the difference between PaaS and traditional web hosting.

#### **Chapter – 5**

56. What do you understand by web service?
57. Explain the Client and Provider perspective of Web Service.
58. Explain in detail the core building block of web service.
59. Define: WSDL.
60. Define: UDDI.
61. Define: SOAP
62. Explain: RPC based communication model.
63. Give the benefits of SaaS.
64. What are the issues of SaaS?
65. Give a diagrammatic component of Open SaaS and SOA.
66. When not use SaaS?
67. Explain the difference between IaaS, PaaS and SaaS.

#### **Chapter-6**

68. What do you mean by CSA (Cloud Security Alliance)?
69. Give the model diagram of cloud security.
70. What do you mean by Brokered cloud storage access system?
71. What are the different types of controls used for cloud security architectures.
72. State the key points associated with CSA (Cloud Security Alliance).
73. Illustrate the working of Brokered cloud storage access system.
74. State the Multi-tenancy issues in the cloud computing.

75. What is Identity Management and Access Control (IAM)?
76. State the different tools of Identity Management and Access Control (IAM).
77. Why is IAM important to cloud computing?
78. State the different method to ensure data security at cloud.
79. State the various levels of security provided by AWS.
80. State the various levels of security provided by Azure.

### **Chapter 7**

81. State the different security issues in cloud computing.
82. Define intercloud.
83. State different challenges with respect to multi-cloud.
84. Define Quality of services in cloud computing.
85. State the components associated with Quality of Service for cloud computing.
86. List various techniques that provide quality of service to cloud applications. Also explain any one of them
87. Explain the following
  - a. Scheduling
  - b. Dynamic Resource Provisioning
88. Define data migration in cloud computing.
89. List the different types of data migration in cloud computing. Also explain any one of them.
90. Explain the following
  - a. Application Migration
  - b. Cloud Migration
91. State the benefits of data migration in cloud computing.
